Select start-up disk
Please select a virtual optical disk file or a physical optical drive containing a disk to start your new virtual machine from.
The disk should be suitable for starting a computer from and should contain the operating system you wish to install on the virtual machine if you want to do that now. The disk will be ejected from the virtual drive automatically next time you switch the virtual machine off, but you can also do this yourself if needed using the Devices menu.
ubuntu-18.04.3-desktop-amd64.iso (1,94 GB)
Start
G:\ubuntu-18.04.3-desktop-amd64.iso

Try Ubuntu
Install Ubuntu
You can try Ubuntu without making any changes to your computer, directly from this CD.
Or if you're ready, you can install Ubuntu alongside (or instead of) your current operating system. This shouldn't take too long.

Pasang
Pembaruan dan perangkat lunak lain
Anda ingin memulai dengan memasang app apa?
Instalasi normal
Peramban web, utilitas, perangkat lunak perkantoran, permainan, dan pemutar media.
Instalasi minimal
Peramban web dan utilitas dasar.
Pilihan lain
Download update ketika sedang menginstall Ubuntu
Ini menghemat waktu setelah instalasi.
Pasang perangkat lunak pihak ketiga untuk perangkat keras Wi-Fi dan grafis dan format-format media tambahan
Perangkat lunak ini tunduk pada persyaratan lisensi disertakan dengan dokumentasinya. Beberapa adalah proprietary.

Jenis instalasi
Komputer ini tidak memiliki sistem operasi. Apa yang ingin Anda lakukan?
Hapus diska dan pasang Ubuntu
Peringatan: Ini akan menghapus semua program-program, dokumen-dokumen, foto-foto, musik, dan berkas-berkas lainnya di dalam semua sistem operasi Anda.
Sandikan instalasi Ubuntu baru untuk keamanan
Anda akan memilih sandi pada langkah selanjutnya.
Gunakan LVM pada instalasi Ubuntu baru
Ini akan membentuk Pengaturan Volum Logis. Ini juga dapat mengambil gambar dan mempermudah pengubahan ukuran partisi.
Sesuatu yang lain
Anda dapat membuat atau mengubah ukuran partisi, atau memilih banyak partisi untuk Ubuntu.

Apache2 Ubuntu Default Page
ubuntu
It works!
This is the default welcome page used to test the correct operation of the Apache2 server after installation on Ubuntu systems. It is based on the equivalent page on Debian, from which the Ubuntu Apache packaging is derived. If you can read this page, it means that the Apache HTTP server installed at this site is working properly. You should replace this file (located at /var/www/html/index.html) before continuing to operate your HTTP server.
If you are a normal user of this web site and don't know what this page is about, this probably means that the site is currently unavailable due to maintenance. If the problem persists, please contact the site's administrator.
Configuration Overview
Ubuntu's Apache2 default configuration is different from the upstream default configuration, and split into several files optimized for interaction with Ubuntu tools. The configuration system is fully documented in /usr/share/doc/apache2/README.Debian.gz. Refer to this for the full documentation. Documentation for the web server itself can be found by accessing the manual if the apache2-doc package was installed on this server.
The configuration layout for an Apache2 web server installation on Ubuntu systems is as follows:
/etc/apache2/
|-- apache2.conf
| `-- ports.conf
|-- mods-enabled
